

Residual analysis (P12 · LVF · θ): what R^2 hides — full error distributions and dynamics

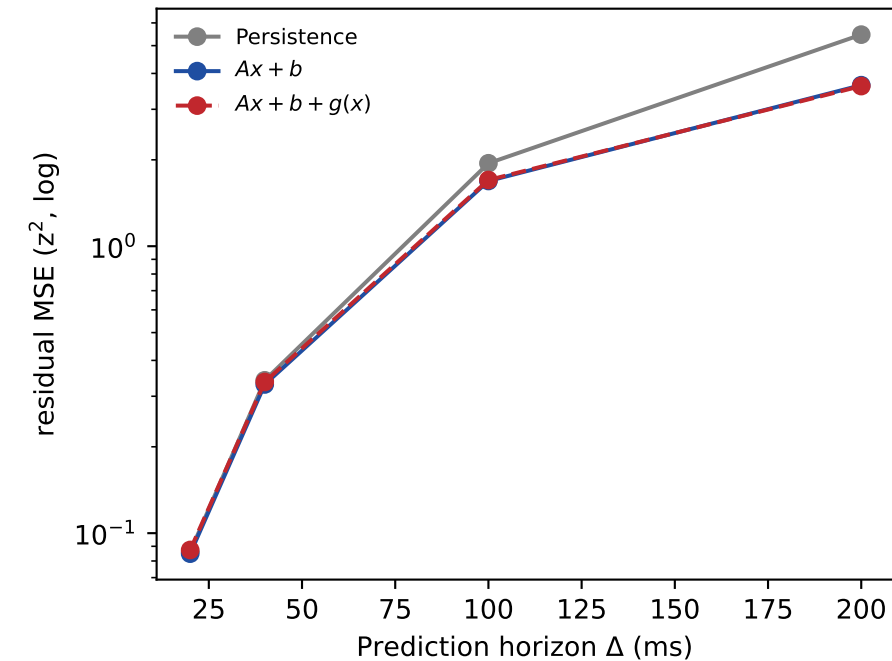

A ID residuals per model, $\Delta=20$ ms

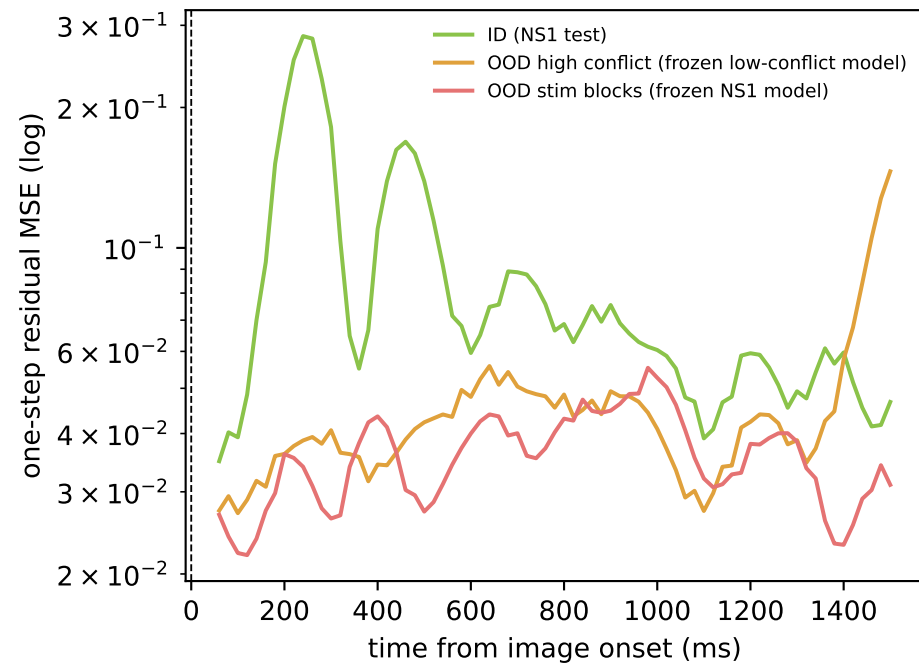

B ID residuals per model, $\Delta=200$ ms

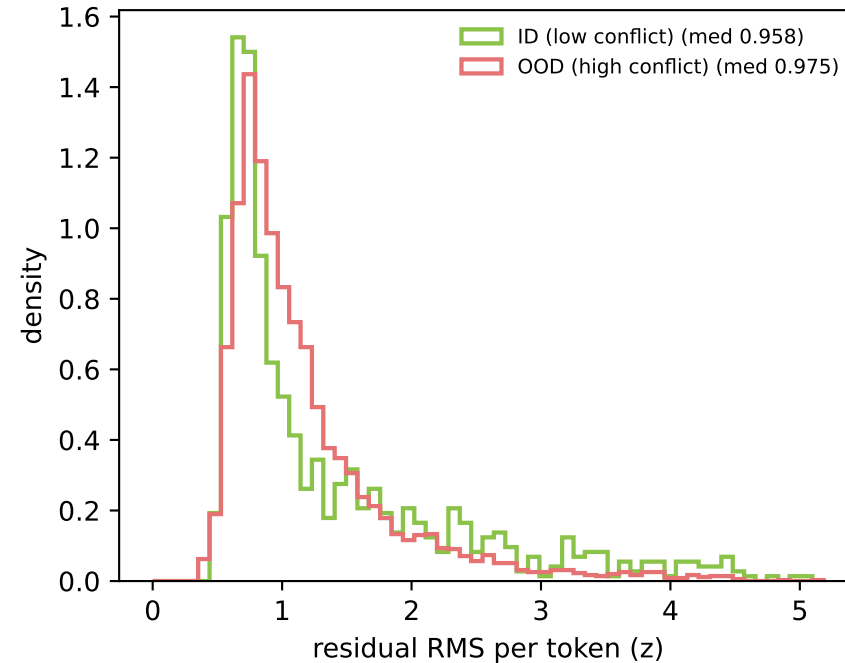

C residual MSE vs horizon (held-out NS1)

D residual time course, $\Delta=20$ ms

E conflict shift: frozen Ax + b, $\Delta=200$ ms

F stim-block shift: frozen Ax + b, $\Delta=200$ ms
