

Proposed paper figure arrangement

Figure 1 — Framing

Closed-loop stimulation: biological and language-model systems

Figure 3 — Robust steerability

Robust steerability as a prospective predictor

Figure 5 — OOD benchmark

OOD controller benchmark and robust-control crossover

Figure S1 — H_∞ validation

Validation and optimization of finite-horizon H_∞ synthesis

Figure S3 — Tuning and ablations

Gain selection and robustness ablations

Figure 2 — Dynamics and residuals

Representation dynamics and residual failure modes

Figure 4 — ID benchmark

In-distribution controller benchmark across model scale

Figure 6 — Long context

Long-context stress test for robust activation control

Figure S2 — Nonlinearity

Local linearity and nonlinear excursion in representation space
